MILOŠ OBROVAC

FRONTEND DEVELOPER

PROFILE

I'm a self-taught programmer from Novi Sad (Serbia), currently working as an Angular frontend developer. Software development became very attractive to me as I gradually understood the potential for growth that this field offers. I see it as an integral piece in the puzzle that makes my life fulfilling. A job that demands strict technical knowledge, problem-solving creativity, aesthetic concerns, product's intuitiveness, team work AND self-improvement, seems very suitable for my personality.

I spent several years living abroad as a volunteer, an exchange student and as a menial worker, so I'm quite used to adapting to new people and working evironments.

EDUCATION

IT Bootcamp - nonprofit school
Intensive software QA & testing course - 160h

University of Novi Sad - Faculty of Technical Sciences - Postal Traffic and Telecommunications
